D6.3 ACCELERATE Website

The main communication and dissemination tool for the ACCELERATE project is the website

www.accelerate2020.eu

This website, which was activated in January 2017, contains all relevant documentation about the project and its goals, aims and progress, as well as information about the project consortium and the persons in charge of ACCELERATE's implementation.

It will be used to promote the project activities. To fulfill its purpose, the website will be constantly updated with news about the outcome of the project and announcements of ACCELERATE-related events. Furthermore, it will contain all public documents developed in the scope of the project and all deliverables, as long as they are public. The website will be accessible at least until December 2022.
