

CERIC

Open for
Science

The Austrian, Czech, Italian and Slovenian CERIC Partner Facilities provide continuous **fast track access** to some of their instruments for feasibility studies.

More info:

www.ceric-eric.eu/users/open-access/

What is Fast Track Access?

The fast track application allows users to access some of the CERIC instruments in a short time, generally within one month. Facilities dedicate part of their time for these feasibility studies, granted on demand until exhausted.

Proposals for fast track access can be submitted anytime, through the VUO.

Discussion of the experimental plan with instrument scientists is mandatory.
